Education

Oberlin College Oberlin, OH
Bachelor of Arts in Computer Science, Minor in Mathematics *Aug. 2022 – May 2026*

Technical Skills

Programming Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS
Frameworks: React, Node.js, Express, Flask, Django
Databases: MySQL, PostgreSQL, SQLite
Developer Tools: Git/GitHub, GitHub Actions (CI/CD), Docker, VS Code, Visual Studio, Eclipse
Additional: REST APIs, Object-Oriented Design, Browser Automation (Playwright)

Professional Experience

Technology & Data Consultant July 2026 – Present
ALIA Prod *Remote*

- Consolidated and standardized venue and presenter data from multiple industry conference lists into a structured database, performing duplicate detection, data validation, and classification, and revising the database through four rounds of client feedback to improve usability and maintainability.
- Cross-checked external presenter datasets against existing records to identify missing and duplicate entries while preserving client-defined data structure and formatting.
- Used AI-assisted development and productivity tools to accelerate research, data transformation, documentation, and technical workflows while manually validating client-facing outputs for accuracy.
- Audited and updated client websites for usability, accessibility, SEO, content structure, and performance, translating findings into prioritized implementation recommendations.

Engineering Intern June 2024 – July 2024
JET *Okayama, Japan*

- Worked in a semiconductor cleanroom environment supporting engineering operations for batch-type wafer processing equipment.
- Assisted engineers with routine troubleshooting, inspections, and process checks to ensure equipment reliability and production readiness.
- Collaborated with cross-functional teams across Japan, California, and India, coordinating weekly progress updates and aligning deliverables with YES's requirements, resulting in 100% on-time delivery of project milestones.

Projects

AuditMe | live demo | *Node.js, Express, React, Playwright, Docker, GitHub Actions* Aug. 2026 – Present

- Built a full-stack website-audit tool: a CLI, Node.js/Express API, and React frontend sharing one core engine, using Playwright browser automation and axe-core to check a URL for functional, SEO/metadata, and WCAG accessibility issues.
- Wrote 36 automated tests (Node test runner, Supertest, Vitest) covering check logic, API routes, and the frontend, run through a GitHub Actions CI/CD pipeline on every push.
- Containerized the app with Docker and deployed it to Render, then diagnosed and fixed a production bug where per-IP rate limiting was keying off the reverse proxy's IP instead of the real client IP.

Taste Collage | live demo | *React, Python, Flask, SQLite, Spotify API, TMDB API, Pillow* 2026

- Built a full-stack web application (React frontend, Flask backend) that lets users search for a music artist, movie, and television show and generate a custom portrait collage from selected media.
- Integrated the Spotify and TMDB APIs through the Flask backend, keeping credentials server-side, and built an image-processing pipeline with Pillow to generate dynamic PNG collages, using SQLite for local catalog metadata.

Extracurricular Activities

Ashby Business Scholar Winter 2025
Ashby Business Scholars Program *Oberlin College*

- Selected as 1 of 14 students for an intensive business leadership and professional development program.

ObieSource Co-President September 2022 – May 2026
Oberlin Open Source Club *Oberlin College*

- Led 100+ person hackathon and technical workshops on cybersecurity and open-source development.
